PROFILE

Java Full Stack Developer with project experience in Spring Boot, React, MySQL, and Oracle. Skilled in REST APIs, JWT authentication, database development, and responsive user interfaces.

EDUCATION

Aryabhatta Knowledge University
Bachelor of Computer Application

Patna, Bihar
Aug 2021 – Aug 2024

Jagdam College, Chapra
Higher Secondary – Physics, Chemistry, Mathematics

Saran, Bihar
Mar 2019 – Apr 2021

SKILLS

Languages: Java (Core and Advanced), JavaScript, SQL, PL/SQL, C

Backend: Spring, Spring Boot, Hibernate ORM, JDBC, REST APIs, JWT Authentication

Frontend: React.js, HTML, CSS, Bootstrap, Tailwind CSS, Vite, Axios

Databases: MySQL, Oracle Database, MongoDB

Tools: Git, GitHub, Maven, Gradle, Postman, Jira, Apache Tomcat, IntelliJ IDEA, Eclipse, VS Code

Additional Training: Microservices, Jenkins, Docker, SonarQube, JUnit, Mockito, Datadog, Log4j, SLF4J, ELK Stack, Chef, Heroku, AWS Basics

PROFESSIONAL TRAINING

Naresh i Technologies
Java Full Stack Training – Completed

Hyderabad, Telangana
Feb 2025 – Mar 2026

- Completed training in Java, Spring, Spring Boot, Microservices, Oracle SQL/PLSQL, frontend development, React.js, DevSecOps tools, and AWS fundamentals.

PROJECTS

LinkedIn Clone – Social Media Platform

Nov 2025

[Live Demo](#) | [GitHub](#)

Technologies: Spring Boot, React, Vite, MySQL, JWT, Axios

- Developed registration, login, profile management, post creation, likes, and comments.
- Implemented JWT-based authentication, image uploads, and responsive React interfaces.
- Designed REST APIs and MySQL schemas for users, posts, likes, and comments using Hibernate ORM.

Chit-Chat – Messaging Application

Sep 2025

[Live Demo](#) | [GitHub](#)

Technologies: Java, Spring Boot, React, Vite, MySQL, REST APIs

- Built a real-time messaging application with a Spring Boot backend and responsive React frontend.
- Developed REST APIs for authentication, chat history, and message management with persistent MySQL storage.

Hospital Management System

Jul 2025

[GitHub](#)

Technologies: Core Java, Advanced Java, JDBC, Oracle SQL, PL/SQL

- Developed a console-based system for patient registration, appointment scheduling, and doctor management.
- Implemented JDBC-based CRUD operations, normalized database schemas, PL/SQL stored procedures, and triggers.
